FORK SLEEVES *(Fork Extensions)*

A flexible solution for extending fork length

Tool-free installation | Easy fit on Forklift forks | Extends fork length when needed

The fork sleeve slides over an existing forklift fork to extend its usable length when additional reach is required.

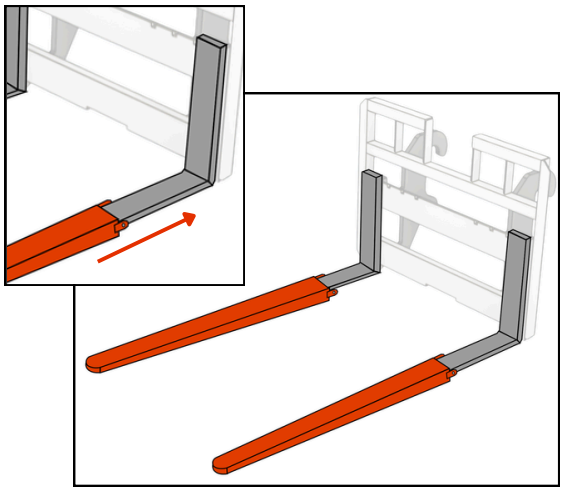

(*) IMPORTANT NOTES BEFORE USE:

1. Before operation, slide the fork sleeve fully onto the fork blade.
2. The locking pin **MUST** be inserted through the hole at the rear and firmly secured with a lynch pin *(ring type)*. Never operate the forklift if any pin is missing.
3. Check your forklift's specifications and fork dimensions carefully to select the correct sleeve length.

(*) Please contact us if you require any assistance in choosing the appropriate length.

WHY CHOOSE A FORK SLEEVE?

1 Handles long or bulky loads

The extended fork supports long or bulky loads, covering applications that existing forks cannot handle.

2 Easy installation

The sleeve fits directly over the existing forklift fork. Supplied locking pins secure the sleeve in place during operation, allowing for quick installation and removal when needed.

3 Durable steel construction

Made from steel, the fork sleeve provides a sturdy structure for material handling applications in warehouses, factories and industrial facilities.

4 Optimized loading onto delivery trucks

The extended fork provides additional reach when loading long or bulky goods onto delivery trucks. In suitable loading configurations, it can help reach further across the truck bed from one side, potentially reducing the need for repeated repositioning and improving loading efficiency.

PRODUCT INFORMATION

Item	Details
Name	Fork Sleeve with Pin Kit
Also known as	Fork Extension
Material	Steel
Length	From 800mm
Package contents	1 pair, with 2 locking pins

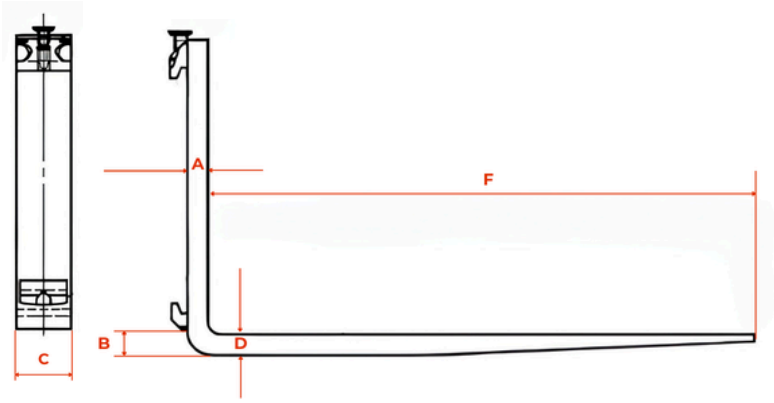

REFERENCE LENGTH TABLE

Forklift Capacity (t)	Forklift Fork Dimensions (Thickness x Width/mm)	Reference Fork Sleeve Length (mm)
0.9	t30 x W80	From 800 mm (e.g. 900, 1,000 mm ...)
1.0 ~ 1.75	t35 x W100	From 1,000 mm (e.g. 1,070, 1,200 mm…)
2.0 ~ 2.5	t36~40 x W120~122	From 1,100 mm (e.g. 1,220, 1,700 mm…)
3.0	t44~45 x W120~122	From 1,200 mm (e.g. 1,370, 1,800 mm…)
3.5 ~ 4.0	t50~56 x W140~150	From 1,200 mm (e.g. 1,220, 1,900 mm…)

(*) We manufacture and supply fork sleeves to your specifications and actual application requirements.
(*) Lengths not listed in the table are available on request. Contact us for a quote and custom manufacturing.

INFORMATION REQUIRED FOR A QUOTATION

1. **Forklift brand**
2. **Forklift model** (e.g., FG10, FG20...) and **rated capacity**
3. Any **attachments** fitted to the forklift (yes or no); if yes, please specify the type
4. Required **fork sleeve length**
5. Forklift fork dimensions as shown in the diagram: A (shank thickness), B, C (fork width), D (fork thickness), F (existing fork length)

SAFETY INTRODUCTION

1. To ensure the safety of operators, equipment and loads, please READ CAREFULLY and FULLY UNDERSTAND all of these instructions and manuals BEFORE installing or operating the product. Always observe the safety regulations and safe operating practices to prevent accidents.

2. Length limit for fork sleeves (per JIS and ISO standards): The fork sleeve length must not exceed 167% (approximately 1.67 times) of the existing fork length.
Example: for a 770 mm existing fork, the maximum fork sleeve length is 1,280 mm. Exceeding this limit will overload the forklift fork and may damage it.

3. Before fitting the fork sleeve, you MUST inspect the forklift fork for wear and deformation. If you find cracks or serious deformation, **STOP USING THE FORK SLEEVE IMMEDIATELY** and contact the supplier of the forklift fork (or the forklift manufacturer) for assistance.

4. Installing fork sleeves increases the load center distance and may reduce the forklift's rated load capacity. Always check the forklift manufacturer's load chart before operation.

5. Never use fork sleeves for lifting personnel or suspended loads.

6. Avoid sudden acceleration, sudden braking, and sharp turns while transporting loads.

(*) Specifications, dimensions, and appearance of this product are subject to change without prior notice for the purpose of quality improvement.
